

SOMRITA BANERJEE

✉ somritabanerjee126@gmail.com  linkedin.com/somrita-banerjee  github.com/somrita-banerjee

SUMMARY

- Backend experience with Node.js, NestJS.
- Skilled in database management with MongoDB, PostgreSQL.
- Developed and optimized RESTful APIs with a focus on scalability, performance, and security.
- Strong front-end development skills, utilizing React and Tailwind CSS.
- Versatile programming skills in Python, C, and C++.

EDUCATION

Guru Nanak Institute of Technology

Bachelor of Technology (CGPA: 8.57/ 10.00)

Expected July 2027

Kolkata

Assembly of Christ School

High School (84.1%)

2022

Barrackpore

EXPERIENCE

Asian Institute of Technology

Intern

3rd Nov - 16th Nov

Onsite

- Worked with QJIS, Epicollect for mapping
- Implemented Explorative Data Analysis on the Air Quality Index of Kolkata to make citizens aware.
- Proposed an Innovative idea for Campus.

PROJECTS

BazaarBay | *MERN, NestJS, NextJS*

- An e-commerce application used to buy and sell products by users through placing orders.
- Integrated payment environment using stripe(demo version)
- Email service integrated by send grid.

ToDo List | *Django, TailwindCss*

- A todo list app using Django to list items to do.

Photo Recognition App | *AWS, React*

- This project uses the AWS CDK to deploy a photo recognition application that utilizes Amazon Rekognition for image analysis. The application is designed to recognize photo and categorize them as suitable pictures and filters out unsuitable ones like nudity or violence.

SMS Spam Classifier | *Tf-Idf Vectorizer, SVM Models and Logistic Regression Models*

- This project uses a machine learning model to classify SMS messages as Spam or Ham

Book Store | *MERN, Bootstrap, Axios, React Router*

- The application is built using the MERN stack.
- Each book has the following fields:- Title, Author, Pubish Year.

Pharmaceutical Drug Authenticity Tracker | *Solidity*

- This is a decentralized application that utilizes smart contracts on the Ethereum blockchain to securely track drug production, distribution, and ownership

Multi signature Wallet | *Solidity*

- An application in which, when a user submits a transaction, multiple owners must approve it.

Chat app | *React, Firebase, TailwindCss*

- RealTime Chat Application with firebase.

SKILLS

Programming Languages: TypeScript, C++, C, Kotlin, Python, Solidity

Backend Development: Node.js, Express, NestJS

Frontend Development: React, Tailwind, NextJS

Database Management: PostgreSQL, MongoDB, MySQL, Firebase

Cloud & DevOps: Git, Docker

Data Analytics Skill: Data Analysis, Data Modeling, Spreadsheets, Tableau

Others Basics: Blockchain, Android Studio, QJIS

ACHIEVEMENTS

- Winner of the Idea presentation in Global Innovation Internship Programme at the Asian Institute of Technology.
- Published a Patent on the title - System and procedure for identifying and stopping electronic modification of qr codes in financial transactions

CERTIFICATIONS

- Winner in the Global Innovation Project, *AIT, Completed in Nov 2025*
- Usefulness of Remote sensing and GIS for Environmental studies, *Isro, Completed in July 2021*
- Introduction to Cloud 101, *AWS Educate, Completed in June 2025*
- AWS Educate Getting Started with Serverless, *AWS Educate, Completed in June 2025*
- From Learner to Builder: Become an AI Agent Architect, *IBM, Completed in July 2025*
- Data Analytics Job Simulation, *Deloitte, Completed in June 2025*
- Cyber Job Simulation, *Deloitte, Completed in June 2025*
- Technology Job Simulation, *Deloitte, Completed in June 2025*
- Blockchain Fundamentals, *Chainlink Labs, Completed in November 2024*
- Intro to Machine Learning, *Kaggle, Completed in January 2025*
- Intro to Programming using Python, *Kaggle, Completed in January 2025*
- Idea Submission on Green Campus Initiatives, *GNIT, Completed in August, 2024*
- Cyber security and practical hands-on ethical hacking and career guidance, *GNIT, Completed in April 2024*
